Installation

The AX-GS-TC3-O2 should be installed by a suitably qualified technician in accordance with prevailing regulations and any guidelines for the equipment to which it is to be connected. It is not suitable for use with mains voltage. Considering the nature of the hazard and the interaction of the gas detection system with other systems in place, the system designer should choose the detector placement location appropriately.

Ensure that all power is disconnected before carrying out any work on the transmitter

Connections

Standalone detector

Note: Cabling must be screened type and used as indicated. Use min 1.5sq.mm cable. Cable must be suitable for the area of operation.
